To whom it may concern

It is my pleasure to recommend Senior Citizens Chautari for any opportunity particularly on ageing issues. It is one of very few organizations which became successful to gain recognition in national and international platforms in a very short time.

The organization has been continuously contributing to healthy ageing in the local community through regular health camps (diabetic and blood pressure test), door to door health check-up, chair yoga and other activities. The organisation facilitates local senior citizens to utilize the public Fitness Park for their active ageing. Similarly, it has wide networking with other community and national level organizations. Ageing Nepal has also collaborated with the organization for many community level activities like awareness building, cleaning campaigns and many more. It was a great experience to work with the team of Senior Citizens Chautari. Their commitment, hard work and dedication towards work helped us to conduct all works effectively and successfully.

I believe that Senior Citizens Chautari would be the best partner for any community level work particularly on ageing issues.

Please do not hesitate to contact me for any additional information and clarification if needed.

Sincerely

Krishna M. Gautam
Founder Chairperson
Ageing Nepal
